Telehealth Tip Sheet: Phone and Video Visits		
BEFORE THE VISIT: PREPARATION		
• Scheduling	For scheduling, if possible best with a provider known to patient	
Chart review	Review key interim history	
 Documentation 	Start the clinic note or add to the template started by the nursing staff who made	
	initial contact with the key interim history	
	Create a mental agenda, if not written outline, in your HPI prior to calling	
• Self-preparation	Take a breath to ready yourself for the call	
	Make sure you are comfortably seated before you call the patient	
	Check that the background in your video is not distracting	
	If possible be away from noisy areas – such as others talking or on camera	
KEY COMMUNICATION TIPS FOR PHONE AND VIDEO VISITS		
Maintain full	Remove all distractions, and avoid multitasking (checking emails, etc) as	
attention	patients can pick up on this	
 Convey attention 	Use warm tone of voice throughout	
and interest	 Use verbal listening acknowledgments such as uh-huhs, okay, etc 	
	For video, use explicit non-verbal listening such as eye contact and nodding	
	Summarize periodically	
Pacing and	Speak slowly and clearly	
language	Avoid jargon unless necessary	
	Pause after asking questions	
	Pause for patient questions and elaborations more frequently	
Explicit empathy	Listen/watch carefully for patient emotional cues – including pauses or	
	hesitation	
	• Increase explicit empathic statements especially on phone since patient won't	
	see nonverbal empathy "Gosh, this sounds really tough."	
BEGINNING THE CALL		
• Introductions	Identify patient "I just need to confirm your full name and birth date"	
	and (re) introduce yourself;	
	Check that this is a good time for patient to talk	
	Make certain that they are in a safe place and conversation can be confidential	
	Warm greeting: Smile (will come through in tone of voice) and make sure you	
	indicate you are happy to talk to the patient	
Initial check in	Check that patient can hear/see you	
	Indicate how you will re-connect with patient if disconnected	
	Rapport building - Sanatially devices Cavid 10 and how positions in against	
	Especially during Covid19 ask how patient is coping Connect on a personal level.	
Orientation	Connect on a personal level Describe your understanding of visit purpose (from MA_MyChart_etc). If relevant	
• Orientation	 Describe your understanding of visit purpose (from MA, MyChart, etc). If relevant, describe visit duration 	
	 Documentation: If documenting during conversation, explicitly state that you will be 	
	typing the information during the visit and sharing notes in MyChart after the visit	
	Tring the information adming the visit and sharing hotes in Myenart after the visit	

CATHEDING INFORMATION, UR.		
GATHERING INFORMATION: HPI etc		
• A	genda setting	Elicit list of problems/concerns patient wants to talk about up front
		Add what you want to talk about
		Negotiate what can and cannot be covered in this visit
• A	sking questions	Speak slowly, clearly and pause after asking questions
		Avoid jargon
		Listen attentively
		Clarify what patient says using clarifying questions, repetition and summary
• Si	ignposting	Explicitly identify when moving from one topic to another
		Tell patient when you are looking at or writing in the chart
SHARING INFORMATION: PATIENT EDUCATION		
• S	tructure the	Signpost the number and types of issues you will be talking about for easier
C	onversations	tracking. I want to talk about 3 things: your test results, your medications and where
		we go from here
		• Indicate when moving to new topic "Now that we have discussed your test results I
		want to move on to talk about what this means for your medications"
		Summarize frequently
• N	1inimize	Speak slowly and clearly
ir	nformation	• Shorten your educational spiels. Break up your explanations into short chunks .
d	ensity	Repeat them if necessary.
• E	licit patient	Assess patient knowledge before new topic "What do you know about diabetes"
ir	nput frequently	Periodically check patient understanding and concerns about information
		• Check for patient questions frequently "What questions do you have so far?"
• D	ocumentation	• Can type in AVS the instructions for the patient to have them available in MyChart
		after the visit.
• T	each back	Teach back: Eliciting patient understanding is particularly important when you can't
		see them. Ask them to summarize their understanding of specific, important things
		such as next steps, management options or home care
CLOSING THE VISIT		
• 0	rientation	• Orient the patient to the end of the encounter "We have just a few minutes left and
		I want to summarize and plan next steps."
• R	eview	Be clear about the plan. Review what you discussed during the call
		• Establish what will happen after you hang up (follow-up, next steps, etc).
		Identify who to contact with additional concerns
		Elicit any additional questions
• D	ocumentation	• Encourage the patient to sign up for MyChart - to facilitate ongoing communication.
		If you have the capability, send an After-Visit Summary through the portal so that
		patients will have something in writing from the phone visit.
		Order the Follow-up visit either via phone, video, or in-person and write it into the
		AVS.
		• Look at how long the telephone conversation was to document time prior to ending
		the call.
