Application for National Representative Post UK

Please find attached my CV in application for this post. I have been Deputy National Representative for the UK since 2017 and recently took over as National Representative when Lorraine Noble stepped down.

In my role as DNR I have helped Lorraine promote the work of EACH to our UK members and beyond, speaking about EACH at meetings of the UK Council of Clinical Communication. I arranged a successful “zoom” meeting of UK members to share work about remote consultation skills and with Lorraine, have led networking events at EACH conferences. I have attended Advisory Committee meetings remotely and in person and have actively contributed where possible.

I am a huge advocate of EACH and have personally gained a lot from my membership. I have presented work at the conferences in Heidelberg, Porto and the recent online event. I am keen to increase the engagement of the UK EACH community and I am planning future events with an overall aim of retaining and growing the membership.

Thank you for your consideration.

Andy Ward
