RESEARCH SPECIALTIES

Summary Statement:

My main research interests relate to medical education in all settings (undergraduate, postgraduate, and continuing medical education), communication in healthcare, and teaching of communication skills in medical training, with a special interest in general practice communication teaching. My research interests also included sleep health and education of medical students, patient safety threats, and, teamwork and communication. I have experience in several research methods, such as quantitative and qualitative analysis, as well

as reviews, using data collected from several sources such as interviews, videos, surveys, institutional data, clinical records review, and previously published papers.

EXTRACURRICULAR INTERESTS

I enjoy spending time with my family (my wife, my daughter and our lovely puppy Pudim). I like to take walks with them, be it in the park or in the beach. I also enjoy exercising such as running or weight training. I have a passion for different cultures, so one of my hobbies is to learn new languages – that makes me feel closer to different people, so I can communicate with them. In my downtime, I enjoy having friends over for meals and playing board games.
